

## Indiana Public Safety Officials Stress Preparedness Before Winter Weather Descends

FOR IMMEDIATE RELEASE

**November 16-22, 2014 is Winter Weather Preparedness Week in Indiana.**

Colder weather has settled into the Midwest. The National Weather Service (NWS) and our partners in public safety encourage Hoosiers to begin preparing now for what could be a cold and snowy winter.

This winter, temperatures near normal and precipitation below normal are anticipated. Still, even in such winters, Indiana has periods of cold and snow. Winter weather systems may occur less frequently, but some will still bring snow, rain, sleet and freezing rain leading to significant impacts for travelers. "For Indiana, winter throws a variety of weather our way," said Michael Lewis, Warning Coordination Meteorologist of the Northern Indiana National Weather Service (NWS) Office. "We must work together to become a truly Weather Ready Nation, and it's everyone's job to prepare for and take safe action when the National Weather Service issues winter weather warnings."

"Severe Storms and flooding also affect Hoosiers during winter," said Meteorologist in Charge Mark Frazier of the NWS Northern Indiana office. "Indiana had tornadoes and floods last February and March, so being prepared and taking action for any hazard are crucial to safety," added Frazier.

For more information about winter weather, see [www.nws.noaa.gov/om/winter](http://www.nws.noaa.gov/om/winter)

"Key to preparing for winter is personal responsibility," said IDHS Senior Public Information Officer John Erickson. "Keep a few essential supplies readily available in your home in case a winter storm disrupts utilities or prevents you from being able to travel safely."

IDHS recommends assembling and maintaining a disaster kit. **Ten items to include in your family's disaster kit are:**

1. Food and water for 3 days (includes 1 gallon of water per person, per day)
2. Battery operated or hand crank all hazards radio
3. Flashlight
4. Extra batteries for radio, flashlight and cell phone
5. First aid kit
6. Extra clothing, sturdy shoes, blankets, and personal hygiene items
7. List of emergency phone numbers

8. Important documents (copies of photo ID, social security card, insurance and banking information)
9. Cash (Small bills. Power outages can limit use of ATMs and credit cards)
10. Special items (baby formula, insulin, life sustaining medication)

“Have a Disaster Supply Kit for your vehicle also,” said Ann Gregson, Disaster Public Affairs Spokesperson for the American Red Cross of Greater Indianapolis. “This is a good time to “winterize” your Disaster Supplies Kits for your vehicle. Add warm clothing, extra blankets and hats, mittens, etc. to your kit and make sure your vehicle kit includes bottled water, first aid supplies, essential medications, extra coats, blankets, flashlights, kitty litter, a small shovel, a candle, metal container and matches and a red cloth to tie on your car to signal for help,” Gregson added.

“Crashes spike during the first accumulation of snow or ice as drivers relearn winter driving practices. INDOT urges everyone to plan extra time and be cautious of others, especially after last year’s mild winter,” said Indiana Department of Transportation (INDOT) Chief of Staff Troy Woodruff. “If you must drive during a winter storm, stay a safe distance behind snow plow trucks. Passing a plow truck in action endangers yourself and others.”

“Obeying posted speed limits, or reducing your speed below these limits when conditions require are keys to reducing the potential for a crash,” added Captain Dave Bursten of the Indiana State Police.

Travel to school can be difficult during snow and ice storms. “School bus drivers are trained and ready for winter driving,” said Mike LaRocco with the Indiana Department of Education.
